

ABSTRACT

[0072] A cleaning apparatus includes a handle, a support rotatably coupled to the handle for rotation by a drive motor mounted in the handle and a cleaning element mountable on the support. The cleaning element a flexible mat fixed about the support or about a core mountable on the support. An auxiliary cleaning element attachment may be mounted on the end wall of the support. A liquid container may be mounted in the support or used to form the support to dispense fluid to the cleaning element disposed about the support.
